# tables that flip, fold and move...

At Prismatique, we specialize in tables. That's it – just tables for more than 25 years.

Do you need tables that work hard and then roll out of sight? We have a great selection. Or tables that can help create a high image room, then flip and nest to save space? We have them.

As table specialists, we offer the greatest variety of finishes, shapes and options in the business. Our "can do" attitude, our experience and our dedication to meeting customer expectations mean that if you need a table, you need Prismatique!

## engineering meets passion...

### Engineering

Consider the details: below is just one of Prismatic's connection designs using a height-adjustable telescoping post over an extruded leg base. Other companies settle for a simple fastener-through-plate connection. Look under our tables and you'll uncover solid welds (as opposed to fasteners) heavy-duty locking devices, oversized plates and metal-to-metal connections. You'll find that our engineering heritage shows everywhere.

### Mobility

It's a laptop world and everyone wants the flexibility to do it their way. We couldn't agree more, which is why we lead the way in mobility and storage options for tables. Prismatic uses only 3" lockable casters to add stability, heavy-duty locking mechanisms that snap crisply into place, and a variety of storage and cart solutions to move tables between assignments.

Our engineers sweat the details so you get tables that work hard and are built to last. But our passion for design reminds us of the need for beautiful finishes, lots of colors, great shapes and continuous refinement. Engineering and passion come together in all of our tables. It works for us, and we know it'll work for you.

## Customization

We have the greatest range of tables in the business, but if that's not enough, we'll work with you to suit your needs. Whether it's a variation in detailing, technology, size, shape or finish, count on Prismatic to listen first, then roll up our sleeves to deliver the perfect solution. Our experience and knowledge in tables allow us to offer customized solutions with assurance.

## Passion

Life is too short for boring tables, or tables that don't perform as they should. At Prismatic we're interested in every detail of every table. We fuss over the aesthetics, the durability of the finishes and the strength of the mechanisms. After all, that's all we do. We are focused on tables, and we wouldn't have it any other way.

### Dynamic conference

Conference rooms, teaming departments, huddle areas

### Training and seminar

Training rooms, classrooms, learning labs

### Multipurpose

Cafeterias, utility rooms, workstation extensions

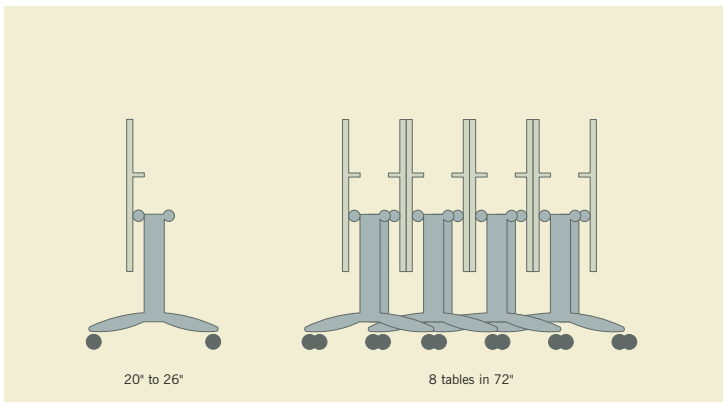

## dynamic conference...

Conference tables for a one-on-one or a global gathering

In today's dynamic spaces, people come and go... meetings come and go... it only makes sense that the tables come and go too.

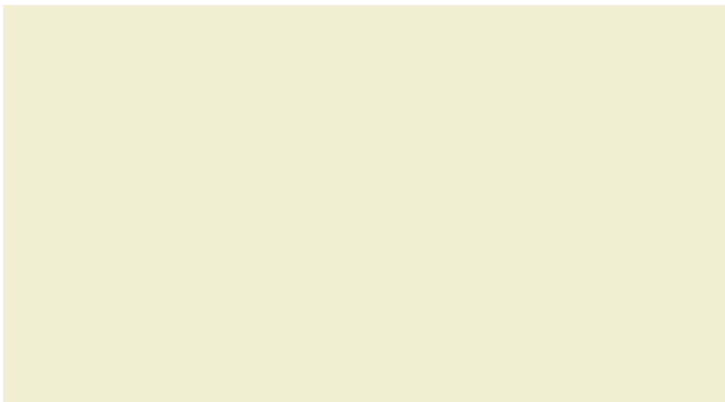

Prismatique tables are so easy to set up, configure and break down that you can prepare for meetings in no time. You'll benefit from quick-disconnect technology interface units, wire managers, ganging hardware and lockable casters. You have options for nesting or carts for storage. Learn how our unique approach to nesting allows you to store more tables in smaller spaces.

...all built with Prismatique expertise.

We've seen and met every table need so far – what can we do for you?

# training and seminar...

So easy to configure, wire, break down and store, you won't need any training

11

For over 25 years, Prismatic has met the design challenges of multi-faceted, multipurpose tables. From classrooms to cafeterias, reception areas to utility rooms, we can help you with solutions. With options in height adjustment, technology, casters, glides and numerous laminate and wood finishes, we will either have it as part of our standard offering or customize it to your needs.

Prismatique has engineered solutions for all types of folding and mobile tables.

We've developed unique double-engaging flip-top mechanisms (top), "over/under" folding for short tables (above) and a diagonal folding detail for column bases (below).

We also offer a variety of folding options for large-diameter round tables (lower left).
